

Check List for Dump Ezy Installations;

- | | |
|----|--|
| 1 | Is the site level? Liquid doesn't flow up hill |
| 2 | Have you a copy of both optimal installation diagrams (levels and bi-directional) |
| 3 | Has the plumbing been installed to allow the shroud to be removed if necessary. (not glued) |
| 4 | Is there provision for a wash down tap as well as a potable water tap? Allow for a good separation between taps. |
| 5 | Has the plumber allowed for non return valves to prevent contamination (both taps) |
| 6 | Is there enough room for vehicles to manoeuvre |
| 7 | Can a driver download from the left as well as the right side of the vehicle? |
| 8 | Is there adequate signage to show non drinking water? The wash down hose IS NOT to be used for filling RV tanks or containers. |
| 9 | Is there suitable signage for directions to get to the dump point? |
| 10 | Is there a rubbish bin for rubbish and possibly a recycle bin as well. |
| 11 | Advise CMCA when installation completed. (HQ and local representative) |
| 12 | RV Friendly Town application can now be sent to ..(HQ and local representative) |
| 13 | Have all relevant stakeholders been consulted on the location (EG local council, user groups, caravan parks, water authority) |
| 14 | To prevent misuse, will the dump point need to be locked and a key be available locally ? |
